

Anirudh Atole

Software Engineer | AI + IAM + Backend

✉ anirudhatole@gmail.com ☎ +917507668681 📍 Bengaluru 🌐 AnirudhAtole 🔄 AnirudhAtole

SUMMARY

Software Engineer with 2.5+ years of experience building scalable backend systems, AI-driven workflows, and enterprise identity integrations. Skilled in Node.js, microservices, IAM, and LLM-based automation.

WORK EXPERIENCE

Software Developer (IAM & Integrations)

AqueraLabs India Pvt Ltd

12/2025 – Present
Bengaluru, India

- Engineered enterprise identity integrations across IdPs, HR systems, and SaaS applications enabling automated user lifecycle management.
- Built SCIM/REST-based connectors for provisioning, updates, and deprovisioning across distributed systems.
- Implemented Joiner–Mover–Leaver (JML) workflows, automating onboarding and offboarding processes.
- Designed secure authentication and authorization systems using OAuth2, SSO, and token-based mechanisms.
- Developed fault-tolerant integration pipelines with logging, retries, and monitoring, improving identity synchronization reliability

Tech: Node.js, TypeScript, REST APIs, SCIM, OAuth2, SSO, AWS, IAM, Microservices

Software Developer

StoreHippo (Enterprise SaaS Ecommerce Platform)

10/2023 – 12/2025
Gurugram, India

- Built LangChain-powered MCP server enabling autonomous agent workflows and tool-calling systems.
- Developed Genie AI (voice-based ecommerce assistant) and Kisan AI for real-time advisory workflows.
- Designed conversational memory systems for personalized recommendations and CRM automation.
- Built WhatsApp automation workflows → reduced manual operations by 60%.
- Optimized checkout systems → reduced cart abandonment by 40%.
- Improved database performance by 50% through query optimization and indexing.

Tech: Node.js, Python, LangChain, AWS, MongoDB, MySQL, Redis, WhatsApp API

EDUCATION

Bachelor of Technology, Computer Science

Dr. Babasaheb Ambedkar Technical University

CGPA: 9.20/10.0

07/2018 – 08/2022

PROJECTS

Real-time Group Chat Application

- Built real-time messaging system with WebSockets, group management, and file sharing. Node.js, Express, JWT, AWS S3, Multer, Socket.io

Premium Expense Tracker

- Developed full-stack expense tracking platform with authentication, reporting, and payment integration.
- Built secure APIs and scalable storage systems. **Tech:** Node.js, TypeScript, SCIM, OAuth2, AWS, Microservices

SKILLS

Node.js, TypeScript, Python, Golang, AWS, Microservices, Distributed Systems, LangChain, LLMs (Gemini), Agentic Workflows • SCIM, OAuth2, SSO • MongoDB, MySQL, PostgreSQL, Redis
